

Axian Requirements for Centralized Monitoring & Observability

Group wide centralized monitoring, observability and operations intelligence platform

- **Group-wide centralized monitoring, observability and operations intelligence platform**
- **Federated operations model**
- **Support dual role: a) Opco level b) Group level**
- **Integration with ServiceNow for auto ticketing**
- **Alignment with Industry best practices and standards**
- **Leverage existing opco monitoring investments by integrating with existing tools**
- **Predictive and proactive operations through AI/AIOps capabilities**
- **Standardize KPIs, escalation models, and runbooks across Opcos**
- **OPEX optimization through automation and shared platform**
- **Multi tenancy model**
- **Scalable platform to support addition of new Opcos with additional infrastructure**
- **Address the current Opcos including Madagascar, Togo, Senegal, Comoros, Tanzania, Kenya, Uganda & other countries**

Complete proposal scope: UA core + OCI O&M + governed GenAI

- **UA: existing tools, telecom assurance & topology**
- **OEM retained: database, Exadata & middleware depth**
- **One Zurich ServiceNow • native UA integration**
- **OCI APM: applications, traces, topology & synthetics**
- **Log Analytics: OKE + open collection for EKS/VKS/OpenShift**
- **OCI GenAI: governed correlation, evidence, zero-touch roadmap**

End-to-end workflow — UA core, OCI evidence and GenAI correlation

- 

Unified Assurance:
deterministic core
Telecom faults, performance,
topology and RCA
- 

OEM retained for deep diagnostics
- 

Native UA → ServiceNow workflow
- 

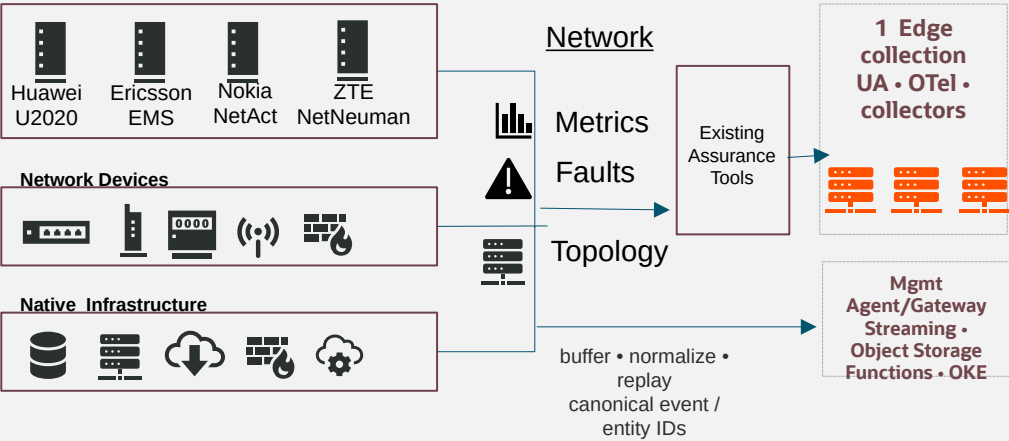

OCI evidence & AI only for
gaps
- 

APM • synthetics • OTel
topology
- 

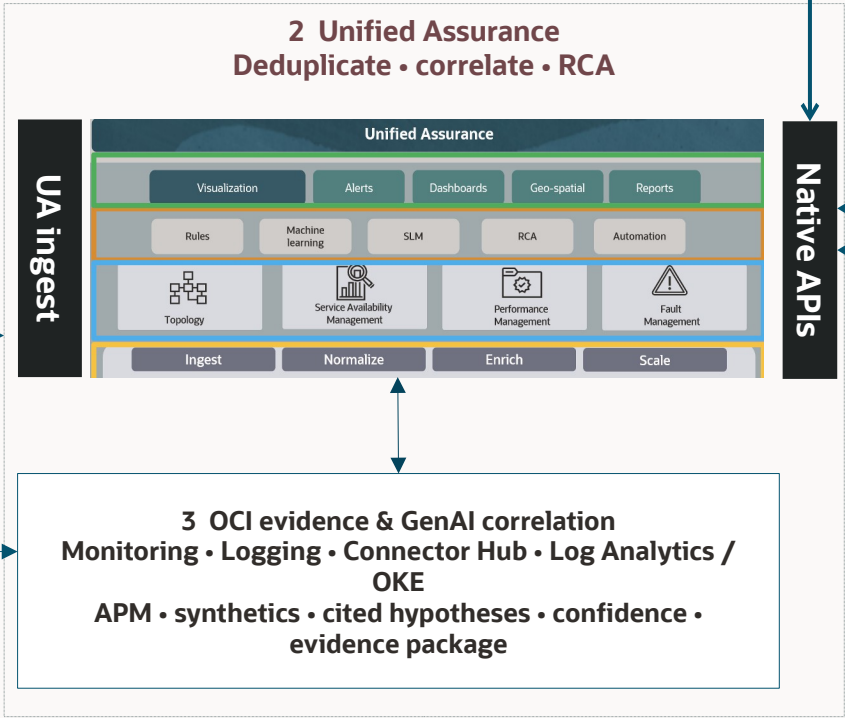

Monitoring • Logging •
Connector Hub
- 

Log Analytics / OKE • OCI GenAI
correlation

Per OpCo / product tools

Group assurance, evidence & AI platform in OCI

IAM • Vault • Audit
Cloud Guard

4 ServiceNow
native UA adapter

5 Product teams
diagnose • approve •
remediate
