

ORACLE

Group Centralized Monitoring & Observability Platform

Management response | Unified Assurance + OCI Observability & Management

AXIAN Telecom

Observability & Security team | RFP AXIAN-IT & Network-OBS-2026 | July 2026

Safe Harbor

This presentation is intended to outline our general product direction. It is intended for information purposes only, and may not be incorporated into any contract. It is not a commitment to deliver any material, code, or functionality, and should not be relied upon in making purchasing decisions. The development, release, timing, and pricing of any features or functionality described for Oracle's products may change and remains at the sole discretion of Oracle Corporation.

Statements in this presentation relating to Oracle's future plans, expectations, beliefs, intentions, and prospects are "forward-looking statements" and are subject to material risks and uncertainties. A detailed discussion of these factors and other risks that affect our business is contained in Oracle's Securities and Exchange Commission (SEC) filings, including our most recent reports on Form 10-K and Form 10-Q under the heading "Risk Factors." These filings are available on the SEC's website or on Oracle's website at <http://www.oracle.com/investor>. All information in this presentation is current as of **INSERT MONTH HERE 2026** and Oracle undertakes no duty to update any statement in light of new information or future events.

Some regulatory certifications or registrations to products or services referenced herein are held by Cerner Corporation. Cerner Corporation is a wholly owned subsidiary of Oracle. Cerner Corporation is an ONC-certified health IT developer and a registered medical device manufacturer in the United States and other jurisdictions worldwide.

Preserve OPCO tools. Standardize Group intelligence.
Make every production action product-owned.

Three complementary layers, one operational view

Use the strongest native capability at each layer and correlate only material operational evidence.

ASSURANCE + OCI O&M

- Unified Assurance / UACE / InfoLake for Group correlation
- OCI Monitoring, Logging, Log Analytics and APM
 - OKE Kubernetes monitoring solution
 - Cross-domain evidence and platform self-monitoring
 - Governed analytics with LoganAI assistance

NATIVE INTEGRATIONS + EXTENSIONS

- OEM remains the deep Oracle management plane
- Native UA ServiceNow Adapter; no OIC path
 - OpenTelemetry and supported collectors preserve portability
 - CSS/partners close unsupported adapter and parser gaps
 - Dedicated incident agent is separate from LoganAI

Federated operations, one governed assurance plane

Solid flow: telemetry, context and ITSM data.

Dashed/approved flow: product-owned action.

Security, identity, audit, IaC and DR apply end to end.

Coverage that fits the operating model

01 Assurance core

Unified Assurance correlates telecom, IT and digital signals with topology, RCA, SLM and Group/OPCO views.

02 OCI O&M

Monitoring, Logging, Log Analytics
Kubernetes Solution and APM add cloud, OKE, application and log investigation.

03 Owned integrations

OEM/database, ServiceNow, networks, OKE and applications remain under their product and Operations teams.

What is not complete out of the box

Partial requirement

OEM packs & exports

ServiceNow workflow

Incident commander

Vendor interfaces

Sizing, DR & residency

Why partial

Validate versions and entitlements

Configure Axian states and tests

LoganAI is not an agent

Discover exact versions and schemas

2 TB/day ambiguous; 6–12m retention; 4h/5–15m recovery

Closure requirement

Pack-access audit + PoV

Native-adapter contract tests

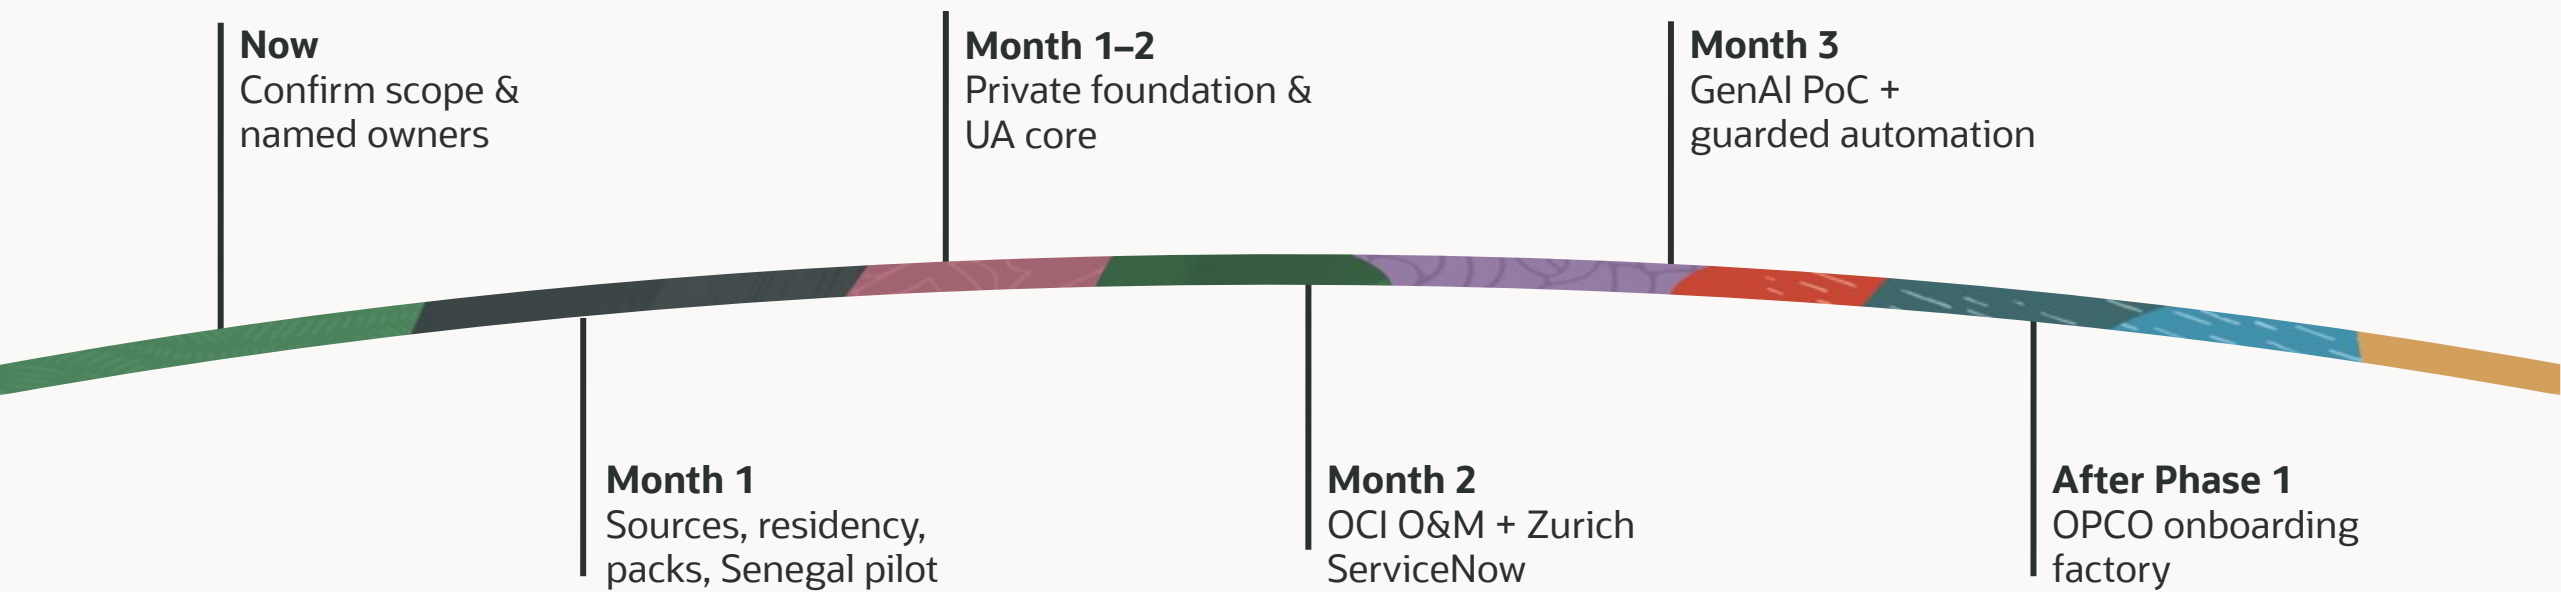

Dedicated-agent design + evaluation

Interface catalogue + PoV

Benchmark + approved decisions

Measured delivery from discovery to rollout

Decisions required to move into proof of value

Approve the architecture direction now; gate commercial and production commitments on evidence.

APPROVE NOW

- Unified Assurance as Group assurance core
 - OCI Log Analytics as OKE monitoring standard
 - Native UA ServiceNow Adapter; no OIC
 - Operations involvement for OEM/ServiceNow
 - OCI AI Team involvement for the dedicated incident agent
 - Evidence-led proof of value

GATE BEFORE COMMITMENT

- OEM packs and target entitlements
 - Proprietary interface support
 - 2 TB/day scope and 6–12m tiering
 - Country residency and AI region
 - 4h RTO / 5–15m RPO drill evidence
 - Zero-touch precision, authority and rollback
 - Product-owned remediation runbooks

Approve a two-OPCO proof of value

Next action

Launch a bounded three-month Senegal Phase 1; validate Zurich ServiceNow, measured telemetry, residency and recovery before rollout.
